## PROFILER FINS (included with PRO & ANAKAO range only)

The F-ONE SUP fins have been developed in order to make our boards even better. Their outline, stiffness and profile were designed specifically for SUP surfing. The PROFILER series was developed to bring high performances, speed and maneuverability to our boards. Suited to all kinds of waves, the cambered profile boosts the accelerations and the progres-

sive flex brings extra maneuverability when turning both at the bottom and at the top of the wave. The boards are simply transformed! Made of epoxy composites and built using RTM TECHNOLOGY for a lighter weight, their M size is versatile enough to suite all riding styles.
